

ThermoAnalytics, Inc. (TAI) seeks a **System Administrator** to join their high-performance team in **Calumet, Michigan**.

It is possible to have it all – a rewarding career that showcases your passion for technology. As a TAI System Administrator, you assist the IT Director in the operation of IT facilities at all TAI offices with a primary responsibility for Linux server maintenance and desktop configuration templates.

COMPENSATION/BENEFITS. \$52,000 starting annual salary in addition to a comprehensive benefit package.

RESPONSIBILITIES. The System Administrator will have two areas of responsibility.

User and desktop support:

- Responsible for direct support of Linux desktop systems.
- Provide direct user support to employees and remote sites.
- Recommend specifications for the purchase of new desktop hardware and software.
- Install, configure and maintain Linux desktop hardware and software.
- Keep desktop security components up-to-date.

System and server support:

- Advise/assist in the planning and procurement of equipment.
- Install, configure and maintain Linux servers.
- Assist in maintaining company network and associated hardware/software.
- Support integration of Linux and Windows platforms.

REQUIRED QUALIFICATIONS FOR A THERMOANALYTICS SYSTEM ADMINISTRATOR.

- Strong technical knowledge of Linux operating systems.
- Experience with Linux and Windows integration using Samba.
- Good understanding of computer networks and associated hardware.
- Effective skills with basic scripting (CSH, Bash, Bourne) in a Linux environment.
- Strong diagnostic and troubleshooting skills.
- Excellent communication skills and the ability to work well in a team setting.
- 2 years' experience with system administration including root-level access on a multi-user network.
- Ability to obtain and maintain a Department of Defense security clearance.

DESIRED QUALIFICATIONS FOR A THERMOANALYTICS SYSTEM ADMINISTRATOR.

- Degree in computer science, management information systems or a technically related field.
- Programming ability in a scripted language (Perl, Python, etc.).
- Programming ability in a compiled language (C, Fortran, etc.)
- Windows server/domain administration.
- 4 years' experience with system administration.
- Certification in system administration/management or related industry-standard program.
- Experience with network and computer security concepts, standards and methods.
- Knowledge of network protocols and monitoring/diagnostic tools.

NO PHONE CALLS or WALK-INS PLEASE.
